C

It is quite powerful high level language and was developed by Denis Ritchie in 1972.

Major features of C language are:

- ❖ It is quite simple and easy programming language.
- ❖ It lies in between low level language and high level language, so is also known as middle level language.
- ❖ It is format free language i.e. no line numbering is required.
- ❖ It is case sensitive i.e. it considers lower and upper alphabet as different. So sum and SUM are taken as different.
- ❖ It makes better utilization of memory.
- ❖ It is highly portable.
- ❖ It provides quite large number of readymade small programs called functions.
- ❖ It is suitable for graphics programming.

COBOL

COBOL stands for Common Business Oriented Language. It was developed by CODASYL (Conference on Data System Language) in 1959.

Major features of COBOL language are:

- ❖ It was first widely used high-level programming language.
- ❖ It is a self-documenting language.
- ❖ It is quite suitable for business problems i.e. problems that has large amount of data but less calculations.
- ❖ It is a structured language i.e. it has a fixed structure.
- ❖ It is very easy to read, modify and debug.
